Electromagnetic Environment Survey

Jemez Springs NM
Commnet Wireless L.L.C.
Jemez Springs, New Mexico

INTRODUCTION

RF Design & Services Division of Tower Engineering Professionals (TEP) of Raleigh, North Carolina, has been retained by Commnet Wireless L.L.C. (Commnet) of Castle Rock, Colorado, to audit compliance with Federal Communications Commission (FCC) guidelines for human exposure to radio frequency (RF) energy at various locations in Jemez Springs, NM. This audit was performed to comply with Jemez Springs Village Code 123.34. This audit provides information gathered during a site visit to make measurements of conditions after the updated Commnet/First Alert facilities began operating and includes photographs and annotated architectural drawings, where required.

Site mitigation options have been assessed and recommendations made where the Maximum Permissible Exposure (MPE) could be exceeded in accessible areas.

SITE AND FACILITY CONSIDERATIONS

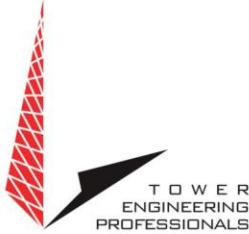

Site Jemez Springs NM is located at 17816 Highway 4 in Jemez Springs, NM at coordinates 35.771535, -106.688797. The structure is a 62' monopole. There are four levels of antennae on this tower with centers of radiation as described below:

1. Commnet Panels @ 60'
2. AT&T/FirstNet Panels @ 48'
3. Emergency Services Dipole Array @ 30'
4. Emergency Services Yagi @ 11'

A photograph of the Jemez Springs NM tower may be found in Appendix 1, Tower Photograph.

METHODOLOGY

TEP personnel conducted field verification of existing antenna locations and made site measurements of all existing RF contributions to the site on December 14th, 2022. Measurements were performed using a NARDA model 550 broadband field meter, serial number F-0223, with a shaped isotropic probe, model EA5091, serial number 01150. This system is considered an "industry standard" for making EME measurements.

RF Design and Services
326 Tryon Road
Raleigh, North Carolina 27603
(815) 721-6954
WWW.TEPGROUP.NET

Measurements were taken as a percent of MPE for the General Population/Uncontrolled standard over a 30 minute period as specified in FCC OET-65.

Six locations, as specified by the Jemez Springs Mayor, were evaluated. These locations are as follows:

- Community Park Playground
- Bodi Mahala Zen Center
- Cul-Du-Sac on Canyon Circle Drive
- Jemez Springs Domestic Water Co-Op (South)
- Jemez Historical Site (North)

In addition to the specified locations, the following locations were also evaluated:

- Entrance to site Jemez Springs NM
- In front of the residence located on the site property

A topographic map of the measurement locations may be found in Appendix 2, Topographic Map. A satellite photo of the measurement locations may be found in Appendix 3, Satellite Photograph.

The FCC guidelines define two separate tiers of exposure limits. As defined by the FCC, these limits are:

General population/uncontrolled exposure. For FCC purposes, applies to human exposure to RF fields when the general public is exposed or in which persons who are exposed as a consequence of their employment may not be made fully aware of the potential for exposure or cannot exercise control over their exposure. Therefore, members of the general public always fall under this category when exposure is not employment related.

Occupational/controlled exposure. For FCC purposes, applies to human exposure to RF fields when persons are exposed as a consequence of their employment and in which those persons who are exposed have been made fully aware of the potential for exposure and can exercise control over their exposure.

Measurement data may be found in Appendix 4, Measurement Data.

MITIGATION RECOMMENDATIONS

Based on the results of the measurement activity, **No** mitigation is required at any of the measurement locations.

CONLUSION AND RECOMMENDATIONS

- This Commnet site **IS** in compliance with the current FCC RF human exposure regulations as outlined in FCC OET-65.
- TEP recommends that any worker attempting to service this antenna facility have RF awareness training and wear a personal RF monitor.
- TEP recommends placement of RF signage in accordance with Commnet RF signage policy.
- Procedures described in OET Bulletin-65 should be followed during the performance of work on the antenna facilities.
