Jemez Springs, NM 87025

**RE: Jemez Springs – Interference Letter**

New Cingular Wireless PCS, LLC is aware of the interference issues that can arise while co-locating with other carriers; therefore, careful isolation studies have been performed to determine the correct vertical and horizontal separation between New Cingular Wireless PCS, LLC's antennas and any other carrier. This avoids any possibility of our frequency interfering with other equipment which is operated within its applicable licensed frequencies in accordance with all applicable laws and regulations. In addition, New Cingular Wireless PCS, LLC has acquired FCC licenses, which exclusively entitle the company to operate within the assigned frequency ranges. Operation within such licensed frequencies should eliminate any interference issues with properly operated CB radios, electronic appliances, pacemakers, fire and police equipment as well as other carriers. In the highly unlikely event that interference does occur, New Cingular Wireless PCS, LLC agrees to fully cooperate with the entity experiencing interference to identify and correct, to the extent reasonably possible, any issues caused by its installation.

New Cingular Wireless PCS, LLC,  
a Delaware limited liability company
