RE: Commnet Site: Jemez Springs – Firstnet Project

Dear Mr. Mike Nealeigh,

Thank you for your review of our proposed project at telecommunication site, Jemez Springs. Please accept this response letter and the attached documents to complete our zoning application.

As part of our discussion on October 21st, we are pleased to submit revised drawings and simulations of a monopole design that includes a smaller mounting frame. This design will reduce further air space between the antennas and pole. We also have updated the simulations to show the tower, mounting, and antenna equipment to be painted with a “natina” color as this is site is within a scenic and historic byway.

We greatly appreciate your time and feedback. Please contact me at 312-858-6546 if you have any questions.

Best Regards,

Cynthia VanDeMark
